RE: Corrosion X  
ATA #: 53-00-00

In response to your fax dated 02-Jul-97, this message is to advise that Sikorsky Aircraft Materials Engineering has previously tested Corrosion X, manufactured by Corrosion Technologies Corp., and found the product to be acceptable for use on Sikorsky products as a MIL-C-81309 Type II Class I Corrosion Preventive Compound, Water Displacing, Ultra-Thin Film. The tests revealed no distinct advantages or disadvantages in the use of Corrosion X as opposed to other products qualified per the same specification.

Please feel free to contact us if additional information is required.

Sincerely,

A handwritten signature in cursive script, appearing to read "Brian Flanagan".
